Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

The text of those sections of Title 35 U.S. Code not included in this action can be found in a prior Office action.

Newly submitted claims 13-19 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the original claims are drawn to a composition only while new claims 13-19 are drawn to methods.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 13-19 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The amendment dated January 29, 2003 is acknowledged

Claims 1-6, 11 and 12 are rejected under 35 U.S.C. 112, second paragraph, claims 1-6, 11 and 12 are rejected under 35 U.S.C. 102(b) and 102(e). Claims 6, 11 and 12 are rejected for double patenting. Claims 1-4 and 6 have been amended and claims 13-19 are new added claims. Claims 7-12 are withdrawn from consideration.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 2 remains rejected as the claim recites "amino acids" rather than "amino acid residues". Claims 5, 6, 9 and 10 are rejected as dependent from rejected base claim 2.

The rejection of claims 1, 3-6, 11 and 12 under 35 U.S.C. 112, is withdrawn based upon the amendment.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Simon et al. (The Journal of Investigative Dermatology, 105: 432-437, 1995). Simon et al. teach a citrulline-containing, modified, synthetic filaggrin peptide (p. 436, col. 2, 1st para.) having at least five consecutive amino acid residues comprising at least one arginine residue (p. 434, col. 2, 2nd para.) and comprising at least one citrulline residue (p. 436, col. 2, 1st para.)(present claim 1), wherein said fragment of at least five residues is from the region of amino acid 93-109 of SEQ ID NO: 7 (p. 434, col. 2, 2nd para.)(present claims 2-4) and which lack a structure identical to that of a preparation of isoforms of filaggrin which is purified from the human epidermis comprising a mixture of isoforms having a molecular weight of 40,000 measured by SDS-PAGE (p. 434, col. 2, 1st para.: molecular weight is 37,000; and col. 2, para. 2) and a pI ranging between 5.8 and 7.4, absent evidence to the contrary (present claim 6). Thus Simon et al. teach all of the elements of claims 1-6 and these claims are anticipated under 35 U.S.C 102(b).

Art Unit: 1653

The rejection of claim 6 under 35 U.S.C. 102(e) as being anticipated by Serre et al. is withdrawn.

The applicant argues that claim 1 is a homogenous mix of peptides, yet claim 1 fails to include this limitation. Further, there is no evidence that the synthetic peptides taught by Simon et al. (The Journal of Investigative Dermatology, 105: 432-437, 1995) are not homogenous mixtures.

Double Patenting

The rejection of claim 6 under the judicially created doctrine of double patenting is withdrawn as the protein in US 5,888,833 is a 40kD protein with a pI between 5.8 and 7.4. (col. 5, lines 1-5).

Conclusion

No claims are allowed. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
